

ABOUT ME

I am an aspiring computational cognitive scientist interested primarily in declarative memory. I currently do research in embodied AI, a field which I believe employs an empirical paradigm conducive for the study of human cognition.

SKILLS

- **Languages:** C++, Python, MATLAB, Bash, Batch
- **Software Tools:** PyTorch, Jax, NLTK, Transformers, W&B, Scikit-Learn, NumPy, SciPy, Git, Docker, OpenMP
- **Other:** DSP, FEA, CFD, Global Optimization

EDUCATION

The University of Michigan

Ann Arbor, MI

M.S. in Computer Science and Engineering, GPA: 4.00/4.00

2022–Current

- Year 1: Natural Language Processing, Randomness and Computation, Computational Modeling of Cognition
- Year 2: Machine Learning, Reinforcement Learning, Advanced Compilers, Computer and Network Security

The University of Texas at Austin

Austin, TX

B.S. in Computational Engineering, Certificate in Evidence and Inquiry, GPA: 3.68/4.00

2016–2020

- Thesis: “Cognitive Processes: A Whiteheadian Perspective”
- Major Coursework: Probability, Stochastic Processes, Differential Eq., Linear Algebra, Scientific Computation
- Certificate Coursework: Mathematical Neuroscience, Neural Systems I and II, Philosophy of Mind

SCHOLARSHIPS AND AWARDS

- NSF Graduate Research Fellowship Winter 2024
Awarded to students pursuing graduate research in STEM fields
- CSE Department Outstanding Graduate Student Instructor Award Winter 2023
Awarded to less than 3% of graduate/undergraduate student instructors in the computer science department
- Northrop Grumman BRAVO to our Stars 2021–2022
Awarded on occasion to high-performing employees. Won once for operational efficiency and twice for performance
- FSTI Award for Excellence in Chemistry Spring 2018
For poster presentation at Undergraduate Research Forum at UT Austin. Awards given to less than 6% of participants
- TIDES Advanced Summer Research Fellowship Summer 2017
Fellowship for computational chemistry research at the Henkelman Group under the Freshman Research Initiative
- Engineering Honors Scholarship 2016–2020
Undergraduate honors program and scholarship awarded to roughly 10% of the UT Austin engineering class
- Polymathic Scholars Interdisciplinary Humanities and Natural Science Honors 2016–2020
Multidisciplinary thesis program that allows students to design their own certificate

RESEARCH EXPERIENCE

LG AI Research

Ann Arbor, MI

Research Intern

2023–Current

- Designed and implemented a cloud-hosted Docker infrastructure to collect a large dataset of internet navigation trajectories via Amazon Mechanical Turk
- Investigating the use of LLMs for automated internet navigation and sequential decision making

Situated Language and Embodied Dialogue (SLED) Lab

Ann Arbor, MI

Research Assistant

2022–Current

- Proposed and developed a novel method for evaluating Theory of Mind capacity within LLMs
- Studying grounded language acquisition in embodied AI agents for applications in robotics

Willerson Center for Cardiovascular Modeling and Simulation

Austin, TX

Research Assistant

2018–2020

- Co-developed FM-Track, an open-source Python package that processes 3D microscope imagery
- Helped create a hierarchical model of AVIC activation, a phenomenon that frequently causes valve diseases
 - * Simulated novel experimental procedures using computational techniques such as ML and FEA
 - * Used empirical data to develop models of cell activation using the math of continuum mechanics

Henkelman Research Group

Austin, TX

Research Assistant

2017

- Doubled the efficiency of a Python algorithm used for high-dimensional, non-convex, global optimization

ENGINEERING EXPERIENCE

Northrop Grumman

San Diego, CA

Systems Engineer (Technical Level II), Pathways Rotational Training Program

2020–2022

- Leveraged my expertise in the HW-, SW-, and algorithm-level architecture of a fielded, software-defined radio to:
 - * Assist a cross-organizational team with the design and deployment of a novel DSP algorithm
 - * Author and obtain customer funding for a proposal detailing improvements to a fielded DSP algorithm
- Created the AI Corporate Catalog, a company-wide database of AI/ML capabilities
- Led a small team in the design and deployment of a C++ unit testing infrastructure

Ansys Government Initiatives (formerly Analytical Graphics Inc.)

Exton, PA

Corporate Systems Engineering Intern

Summer 2019

- Used Python to quantify the accuracy of orbital decay forecasts in STK, AGI’s primary software offering
- Helped develop multiple simulations that modeled orbital dynamics, communications links, and terrain effects
- Outlined a strategy to bolster STK’s collaborative capabilities and presented it to the senior development team

TEACHING EXPERIENCE

- **Graduate Student Instructor** at the University of Michigan (**Outstanding GSI Award**) Winter & Fall 2023
Introduction to Natural Language Processing (EECS 487)

PRESENTATIONS

- X. Feng, A. Khang, **J. Sansom**, N. West, D. Ilitzky, N. Aufiero, E. Lejeune, and M. Sacks, “A Simulation of Heart Valve Interstitial Cell Contractile Behavior in 3D Gels”, presented at the BMES 2020 Virtual Annual Meeting, Oct. 2020.
- A. Khang, E. Lejeune, **J. Sansom**, N. West, and M. Sacks, “Quantifying the 3D Mechanical Traction of the Aortic Heart Valve Interstitial Cell”, presented at the BMES 2019 Virtual Annual Meeting, Oct. 2019.
- **J. Sansom** “Investigating Methodology for Global Optimization,” presented at the College of Natural Sciences Undergraduate Research Forum. April 13th, 2018; Austin, TX. (**FSTI Award for Excellence in Chemistry**)

EXTRACURRICULAR ACTIVITIES

- Chair of Northrop Grumman Pathways Professional Development Committee 2021–2022
Planned and successfully launched a new technical mentorship program for early-career engineers
- Volunteer at the Arc and the Rosedale School 2018–2019
Helped adults and children with cognitive disabilities develop life skills and provided constant positive feedback
- Undergraduate Representative for the Society for Industrial and Applied Mathematics 2018–2019
Worked with leaders to offer membership and resources to the new undergraduate computational sciences program
- Eagle Scout and Troop Guide in the Boy Scouts of America 2016
Led a team of 30 to construct shelves for a homeless shelter. Taught younger scouts various scouting skills
