About Me

I am an incoming Ph.D. student at the University of Michigan co-advised by Drs. Honglak Lee and Joyce Chai. I am interested in intelligence, both artificial and biological. I develop computational systems that emulate the manner in which humans infer general knowledge from small amounts of evidence.

Skills

- **Languages:** Python, C++, JavaScript, HTML, MATLAB, Bash
- **Software Tools:** PyTorch, Jax, NLTK, Transformers, W&B, Scikit-Learn, NumPy, SciPy, Git, Docker, OpenMP, Selenium, Playwright, Flask
- **Other:** DSP, FEA, CFD, Global Optimization

Education

The University of Michigan — Ann Arbor, MI
Ph.D. in Computer Science and Engineering — Fall 2024

The University of Michigan — Ann Arbor, MI
M.S. in Computer Science and Engineering — 2022–2024
- Year 1: Natural Language Processing, Randomness and Computation, Computational Modeling of Cognition
- Year 2: Machine Learning, Reinforcement Learning, Advanced Compilers, Computer and Network Security

The University of Texas at Austin — Austin, TX
B.S. in Computational Engineering, Certificate in Evidence and Inquiry — 2016–2020
- Thesis: "Cognitive Processes: A Whiteheadian Perspective"
- Major Coursework: Probability, Stochastic Processes, Differential Eq., Linear Algebra, Scientific Computation
- Certificate Coursework: Mathematical Neuroscience, Neural Systems I and II, Philosophy of Mind

Scholarships and Awards

- NSF Graduate Research Fellowship — Winter 2024
  Awarded to students pursuing graduate research in STEM fields
- CSE Department Outstanding Graduate Student Instructor Award — Winter & Fall 2023
  Awarded to less than 3% of graduate student instructors in the CS department. Won both semesters spent teaching
- Northrop Grumman BRAVO to our Stars — 2021–2022
  Awarded on occasion to high-performing employees. Won once for operational efficiency and twice for performance
- FSTI Award for Excellence in Chemistry — Spring 2018
  For poster presentation at Undergraduate Research Forum at UT Austin. Awards given to less than 6% of participants
- TIDES Advanced Summer Research Fellowship — Summer 2017
  Fellowship for computational chemistry research at the Henkelman Group under the Freshman Research Initiative
- Engineering Honors Scholarship — 2016–2020
  Undergraduate honors program and scholarship awarded to roughly 10% of the UT Austin engineering class
- Polymathic Scholars Interdisciplinary Humanities and Natural Science Honors — 2016–2020
  Multidisciplinary thesis program that allows students to design their own certificate

RESEARCH EXPERIENCE

LG AI Research — Ann Arbor, MI
Research Intern — 2023–Current

- Designed and implemented a cloud-hosted Docker infrastructure to collect a large dataset of internet navigation trajectories via Amazon Mechanical Turk
- Investigating the use of LLMs for automated internet navigation and sequential decision making

Situated Language and Embodied Dialogue (SLED) Lab — Ann Arbor, MI
Research Assistant — 2022–Current

- Proposed and developed a novel method for evaluating Theory of Mind capacity within LLMs
- Studying grounded language acquisition in embodied AI agents for applications in robotics

Willerson Center for Cardiovascular Modeling and Simulation — Austin, TX
Research Assistant — 2018–2020

- Co-developed FM-Track, an open-source Python package that processes 3D microscope imagery
- Helped create a hierarchical model of AVIC activation, a phenomenon that frequently causes valve diseases
    * Simulated novel experimental procedures using computational techniques such as ML and FEA
    * Used empirical data to develop models of cell activation using the math of continuum mechanics

Henkelman Research Group — Austin, TX
Research Assistant — 2017

- Doubled the efficiency of a Python algorithm used for high-dimensional, non-convex, global optimization

ENGINEERING EXPERIENCE

Northrop Grumman — San Diego, CA
Systems Engineer (Technical Level II), Pathways Rotational Training Program — 2020–2022

- Leveraged my expertise in the HW-, SW-, and algorithm-level architecture of a fielded, software-defined radio to:
    * Assist a cross-organizational team with the design and deployment of a novel DSP algorithm
    * Author and obtain customer funding for a proposal detailing improvements to a fielded DSP algorithm
- Created the AI Corporate Catalog, a company-wide database of AI/ML capabilities
- Led a small team in the design and deployment of a C++ unit testing infrastructure

Ansys Government Initiatives (formerly Analytical Graphics Inc.) — Exton, PA
Corporate Systems Engineering Intern — Summer 2019

- Used Python to quantify the accuracy of orbital decay forecasts in STK, AGI's primary software offering
- Helped develop multiple simulations that modeled orbital dynamics, communications links, and terrain effects
- Outlined a strategy to bolster STK's collaborative capabilities and presented it to the senior development team

TEACHING EXPERIENCE

- **Graduate Student Instructor** at the University of Michigan **(Outstanding GSI Award)** Winter & Fall 2023
  Introduction to Natural Language Processing (EECS 487)

PRESENTATIONS

- X. Feng, A. Khang, **J. Sansom**, N. West, D. Ilitzky, N. Aufiero, E. Lejeune, and M. Sacks, "A Simulation of Heart Valve Interstitial Cell Contractile Behavior in 3D Gels", presented at the BMES 2020 Virtual Annual Meeting, Oct. 2020.
- A. Khang, E. Lejeune, **J. Sansom**, N. West, and M. Sacks, "Quantifying the 3D Mechanical Tractions of the Aortic Heart Valve Interstitial Cell", presented at the BMES 2019 Virtual Annual Meeting, Oct. 2019.
- **J. Sansom** "Investigating Methodology for Global Optimization," presented at the College of Natural Sciences Undergraduate Research Forum. April 13th, 2018; Austin, TX. **(FSTI Award for Excellence in Chemistry)**

EXTRACURRICULAR ACTIVITIES

- Chair of Northrop Grumman Pathways Professional Development Committee   2021–2022
  Planned and successfully launched a new technical mentorship program for early-career engineers
- Volunteer at the Arc and the Rosedale School   2018–2019
  Helped adults and children with cognitive disabilities develop life skills and provided constant positive feedback
- Undergraduate Representative for the Society for Industrial and Applied Mathematics   2018–2019
  Worked with leaders to offer membership and resources to the new undergraduate computational sciences program
- Eagle Scout and Troop Guide in the Boy Scouts of America   2016
  Led a team of 30 to construct shelves for a homeless shelter. Taught younger scouts various scouting skills
